

# GUNDERSEN HEALTH SYSTEM®

March 24th, 2020

I worked with Steven Baughn from the NextGen Group when I was looking to find a better opportunity, as I was no longer enjoying my first position. I received his initial email for Interventional/Structural cardiology position and after discussing it with him, he found a 2<sup>nd</sup> high caliber Structural cardiology job opportunity as well. He assisted me through interview process with both facilities until I received two contract offers, and he then helped me determine which one was a better fit. Unlike other recruiters, he really took time and helped me to prepare for interviewing as well. Whenever I have concerns or questions, he was available (even on weekends) to help me.

I really appreciate his help in guiding me to find my dream job!

Sincerely,

Wah Wah Htun, MD  
Structural/Interventional Cardiologist
